

Vendor Registration and Solicitation Notification

In order to receive notifications regarding new or updated solicitations, a vendor must be registered with Broward County.

Notifications for solicitations or addenda are issued via e-mail to vendors on the bidders list for each solicitation. The bidders list is generated by matching the products or services being solicited to the product/service commodity codes specified in each vendor's registration.

Any vendors who did not receive e-mail notification of a solicitation or addenda listed on this site can be added to the bidders list by visiting the [Vendor Registration](#) section and updating the commodity codes selected. In order to receive e-mail notifications, it is the responsibility of each registered vendor to provide the County with a current, valid e-mail address.

For further information on [How to do Business with Broward County](#), consult the Purchasing Division's reference guide for vendors.
